IN THE SPECIFICATION:

The specification as amended below with replacement paragraphs shows added text with <u>underlining</u> and deleted text with ~~strikethrough~~.

Please replace the paragraph beginning at page 11, line 8, with the following rewritten paragraph:

Figure 2 illustrates a flow diagram for filtering the document to obtain the filtered document. In block 15, the document is parsed to obtain a token stream. The token stream of the document comprises at least one token. However, for a trivial case, a document having no tokens may result from the parsing.
